

July 30, 2016

I am a resident of (b)(6). I am (b)(6) and have been living in the (b)(6) all my life. I am disgusted about how this land has changed and have been corrupted by big industrial farms.

I seen the change of a lot of destruction of the land – good hunting land gone and clearing of fields that you can no longer go on. The use of their dairy farm that they have built here has gone towards the destruction of our water, fish and wild life habitats. You try talking to the employees and they are rude and very corrupted – they do nothing to give back to the community.

You can no longer ride vehicles without end guns from irrigators spraying your vehicles and destroying your property.

I live very close to the farm and had to replace my well once already and water heaters and buy filtration systems for my water because it is not safe or healthy to consume it.

Can no longer hunt on any of their land. I believe they are polluting the nearest streams and large body of water with sewage. Algea is growing in our waters now. We can not eat the fish out of these waters anymore.

For the past 5 years I have developed seizures and causes are unknown at this time. I'll be getting my water tested this week.

I've had a lot of friends that have had heart attacks at young ages and people getting sick from swimming in the lake.

I don't want to use my name because I would like to remain unknown for the reasons of being harassed and my property or family's property being vandalized.

The employees are very rude.
